

Trusted Brands & Dispensaries

A NOTE ABOUT BUYING QUALITY SUPPLEMENTS:

It is VERY important that you purchase your QUALITY supplements from a trusted dispensary to ensure that the nutrients within the capsule actually ARE what is claimed on the label. Also, you want to ensure that the products have been manufactured, shipped, and stored in a way that conserves quality and effectiveness.

The ONLY way to do that is to purchase either directly from the manufacturer or from a trusted dispensary. I have listed several trusted dispensaries as well as several direct links to quality manufacturers. The only caveat is that dispensaries, like most stores, carry both the BEST quality brands as well as brands that I would *never recommend*. Below is a list of brands I TRUST and use with all my clients as well as a list of brands I never recommend. If any brand you are considering is not among my trusted brands listed, I would advise you choose a different product.
